- 1 - Introduction

Rabbit Brain Powder is used for neuroscience research to study the structure and function of the brain. The powder includes important proteins, lipids and other molecules that are important for the neuronal signaling and the synaptic transmission. In drug discovery brain powder is used for screening and development. In the veterinary medicine it is used for diagnostics to identify viruses and bacteria that affect the nervous system.

Information

Cat.No.	50.0050.01 (1 g) 50.0050.10 (10 g) 50.0050.50 (50 g)
Particle Size	< 0.35 mm
PT Time (ACL 300 I.L. Cal. Plasma I.L.)	12.5 s
Sensitivity (PT25% / PT100%)	2.58
Moisture	6,74%
Storage Conditions	-20°C

- 2 - Information

Handling

Storage Conditions -20°C

The product has an expiration date of 12 months at -20°C. In many cases the product is stable for years.
